

OCEANFEED™ EQUINE

GUT HEALTH NATURALLY

Premium Natural Seaweed Blend

100% natural seaweed pellets

- OceanFeed™ Equine is a nutritional feed supplement containing prebiotic polysaccharides and minerals.
- The seaweed blend contains a unique mixture of sulphated and un-sulphated polysaccharides which feed beneficial bacteria in the gut.
- Source of natural minerals which support coat conditioning.
- Blending multiple seaweeds into a single product supports broad spectrum performance, and also allows control over the levels of trace elements such as iodine.

Use as a nutritional supplement:

- In combination with other treatments to maintain or enhance digestive balance.
- To assist in recovery after heavy competition.
- To stabilize the gut microbiota after use of antibiotics.
- To provide minerals and prebiotics which may enhance coat condition

Ocean Harvest is seeking further veterinary channels to assist us in assessing the efficacy of OceanFeed Equine as a nutritional feed supplement or ingredient.

Premium Seaweed Blend

Seaweeds contain unique bioactives which are not found in land plants, and which, when blended appropriately support a healthy gut microbiota and coat conditioning.

- Polysaccharides such as ulvans, fucoidans, and laminarin are a source of soluble and highly fermentable fibre.
- Lectins, phycobiliproteins, peptides, bromophenols, vitamins, and functional amino acids.
- Pigments such as chlorophyll and carotenoids.
- Long chain fatty acids including Omega 3s.

Average Values*

Moisture	13%
Protein	9%
Crude Fat	0.7%

EQUINE CATEGORY	RECOMMENDED USAGE RATE (DAILY)
Horse	45g
Ponies	30g
Foal	15g

*Seaweed is a 100% natural product and analytical values may vary from the typical analysis due to natural variation on the product. Therefore, the values given herein should be considered as typical averages and not as conditions of sale.

OCEANFEED™ EQUINE

GUT HEALTH NATURALLY

"Suffered regularly from excessive nasal discharge and has a dull coat. Gave a dull impression. When inspected, after given 44 days OceanFeed™ Equine, horse already had no nasal discharge for the last two weeks. There was also a significant change in coat and hoof quality visible. Owner very satisfied."

"Horse had on day 0 a skin infection (Dermatophilus Congolensis). A conservative treatment was set up in combination with OceanFeed™ Equine. On day 44 the horse was cured of the skin infection and had clearly an improved coat quality. The horse also performed better on contest than before..."

"Spectacular change coat quality. Horse seems after shaving much less to suffer from sensitive skin and need less often to be shaved. Skin flakes and bald spots are much less numerous present on day 44 compared to day 0"

"OceanFeed™ Equine is part of my daily equine practice to help horses with digestive, immune and metabolic disorders. I also observe noticeable changes in wound healing and healthy hoof growth. I highly recommend OceanFeed™ Equine for general overall health of horses."
